Zion Station Decommissioning and Site Restoration Newsletter

Sept. 29, 2011

Welcome

- **Matt Barker**
RP Technician
- **Frank LoBianco**
Iron Workers
Local 1

 **Don't forget to drop off your TLD for the end of 3rd Quarter Exchange!**

3rd Quarter TLD change-out will occur on Friday, September 30th.

The last working day for most personnel is today, Thursday, September 29th.

Please drop off your TLD on the board inside the Main Gate House or with Danny Adams on the 1st floor of the ENC Bldg.

Better to TIE OFF than to FLY OFF!

Safety Slogan of the Month Contest . . .

The Safety Committee sponsors a safety slogan contest each month and awards a monthly parking pass for the winning slogan.

The winning safety slogan for the month of October—*Better to TIE OFF than to FLY OFF*—was submitted by **Angelo Romano**.

Some of the honorable mentions that also received votes include:

- **Safety Glasses or Braille Classes**—John Gilmore
- **Never think working safe is in vain when it could save a lifetime of pain**—George Wells
- **You made it this far safely...Don't turn back now**—Dana Zaionc
- **Stay safe. Someone at home is waiting for you**—Richard Warnick
- **Invest in Tomorrow. Practice Safety Today**—Sean Corbett

Thanks to all who participated this month and remember—your submittal remains in the voting pool for four months. Get those creative juices flowing. We're looking forward to seeing the new slogan submittals for the month of November!

The Safety Committee

Box**

**RECOGNIZE
AND BELIEVE
THAT YOUR
SIGNATURE IS
YOUR MARK
OF PRIDE—
TREAT IT
THAT WAY**

When you initial
or sign for a
completed activity,
that mark you make
on that paper
reflects “who did it,”
and because it’s you,
it needs to mean
everything.

It needs to
state that you read it,
you understand it,
you agree with it,
it is correct, and you
own it. Stand behind
the quality and
take pride in
your signature.

Reactor Vessel Internals Segmentation Project Update . . .

Underwater Mock-Up Testing for the Unit 2 Reactor Vessel Internals Segmentation Project tooling is currently underway in Milwaukee.

ZS Radiation Protection personnel participating in the mock-up testing activities in Milwaukee. Left to right: Deb Marshall, Dan Mihalik, Cassandra Buckley, Chuck Fuller, Bill Zielke, Jason Gonzales and Mike McCambridge

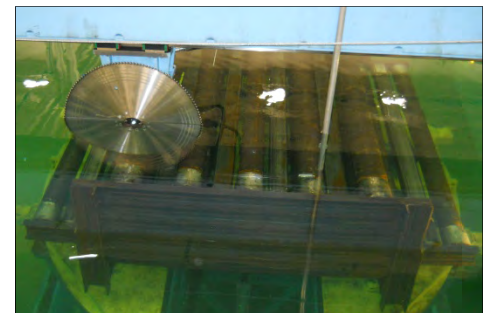

The team members are completing
“Management Observation Cards” to document both positive and negative issues for the mock-up.

All of the tooling will be delivered to Zion Station beginning on October 10th, with the CHORCE and BMT scheduled to be moved into containment that same day.

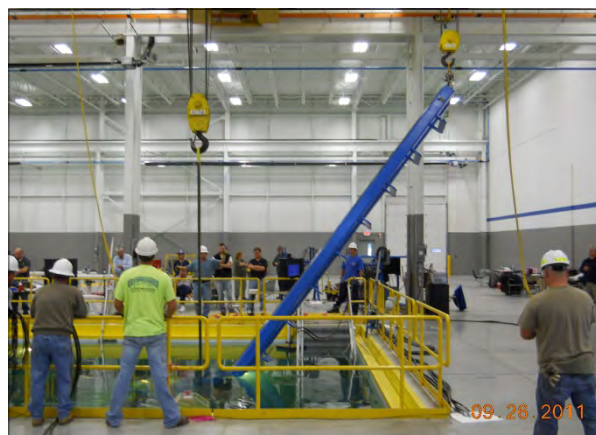

A final walkdown of the Unit 2 containment

Testing of the three main segmentation tools, the Circumferential Hydraulically Operated Cutting Equipment (CHORCE), Bolt Milling Tool (BMT), and Volume Reduction Station (VRS) is proceeding as planned.

Various ZS Management personnel and Project Team Members are participating in the mock-up testing activities, including personnel from Radiation Protection, Safety, D&D Riggers, and Schedulers.

Volume Reduction Station (VRS) cutting the upper internals test piece.

The Bolt Milling Tool (BMT) being inserted into the test pit at In-Place Machining in Milwaukee.

and reactor cavity is planned for October 5th to ensure that we are ready for move-in by Siempelkamp the following week. The team will perform a Final Project Team Challenge on October 6th to assess the readiness of various project areas.

The project is still on track to begin cavity fill operations on November 9th.

**October
Parking
Pass
Winners!**

**Arthur Hammond
Roxanne Hendrickson
Matthew Loar
Olu Ogunnubi
Maureen Turman**

To be eligible to win a parking pass for November, be sure to complete the monthly safety quiz and return it to a Safety Committee member.

Keep Smiling...
*what matters most is
how you see yourself...*

***Not everything
that can be
counted counts,
and not every-
thing that counts
can be counted.***

Albert Einstein

CR Corner: (Noteworthy Condition Reports From Last Week)

- WR# 379330:** Over-rotation of crimping tool disconnected an air hose during ITTR work.
- WR# 379534:** Isolation devices used on breakers outside of the Restricted Area that have beveled operating switches can loosen providing inadequate isolation.
- WR# 379453:** Zion Animal Control removed a bat from the Turbine Building 642 elevation.
- WR# 379685:** ITTR Design Change Package (DCP) records, processing and review issues identified.
- WR# 379681:** Individual incorrectly bypassed the normal RWP process by using an emergency EPD.
- WR# 379801:** Not all RP techs performing waste shipment surveys have received DOT Sub-part H training.
- WR# 379967:** Individual failed to log out of the RWP and HIS System.
- WR# 379864:** Access to air sampling locations was hindered by a change in gate locks that wasn't communicated to HP.
- WR# 379908:** Uneven surface on walkway to the West Service Bldg. presents a trip or fall hazard and rocks on the walkway could potentially be thrown by a snow blower at the Unit 1 SAT.
- WR# 379970:** A metal item passed through the floor grates in Unit 2 and fell from the 617 to 598 elevation. Potential exists for some items to fit through the grating when working on or above it.
- WR# 379969:** Individuals were not aware of work area radiological conditions prior to entering Unit 2—568 elevation.
- WR# 379963:** Individual sustained a cut on finger while cleaning out a sea van.
